

## Mobile Resource Management platform

Brazil Mexico USA Russia

[www.navixy.com](http://www.navixy.com)

# Connecting people, vehicles and assets

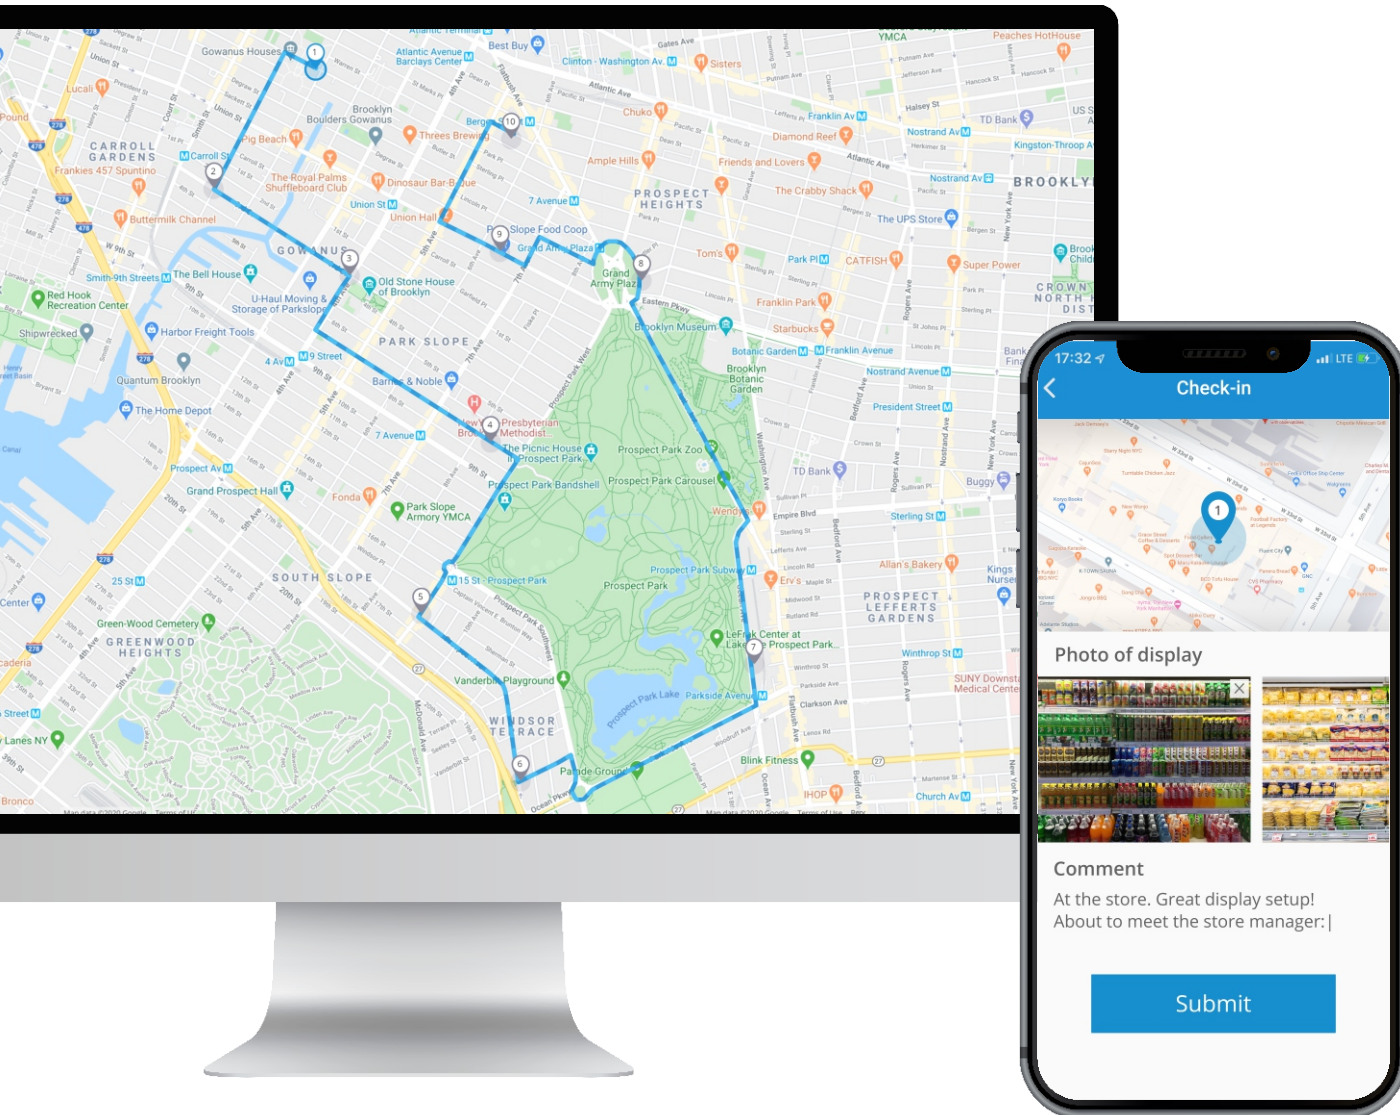

Since 2004 Navixy has been designing future-proof solutions for mobile resource management helping businesses in 140 countries accelerate digital transformation and enterprise mobility. By fusing modern technologies with new vision in telematics we turn complex operations into scalable and intuitive tools.

# Field service

Automate field service operations. Increase mobile workforce productivity, reduce expenses and refine customer experience.

## Automate dispatching

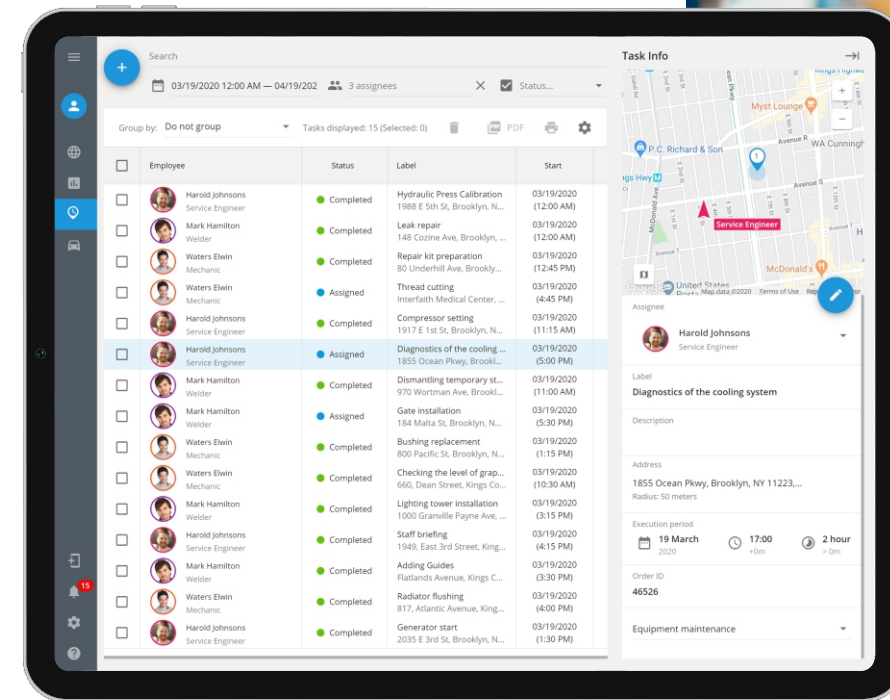

Automate job dispatch to the nearest team. Import tasks from CRMs. Build fastest routes across the assignments.

## Synchronize data

Turn smartphones into a to-do list. Implement mobile forms for instant review. Use in-app chat for real-time assistance without extra costs.

## Control expenses

Calculate working hours and payroll with various metrics. Visualize data via charts and graphs. Automate reporting to any recipients.

## For mobile employees

### Tasks

Send details directly to the employee's smartphone

### Daily routes

Turn tasks into fastest routes, automate recurring jobs

### Check-in

Prove and visualize customer visits with locations and pictures

### Statuses

Enable teams to share their current activity

## For back office

### Digital forms

Build custom forms for any purpose with drag-n-drop

### Route optimization

Save fuel and time on the road with the fastest routes

### Online order tracking

Share courier's location with customers in real time

### Proof of delivery

Capture geo-tagged e-signatures and ratings

# Fleet management

Fuel fleets with powerful innovative tools to cut management expenses, increase productivity, prevent fuel thefts and accidents.

## Vehicle security

Anti-theft   Unauthorized movement  
Engine block   Crash detection  
Tow detection   Panic button

## Efficiency and costs

Fuel monitoring   Engine hours  
Eco driving   Maintenance  
MIL / DTC error codes

## Driver management

Job dispatching   Driving score  
Online chat   Ignition interlock  
Driver ID

## Compliance

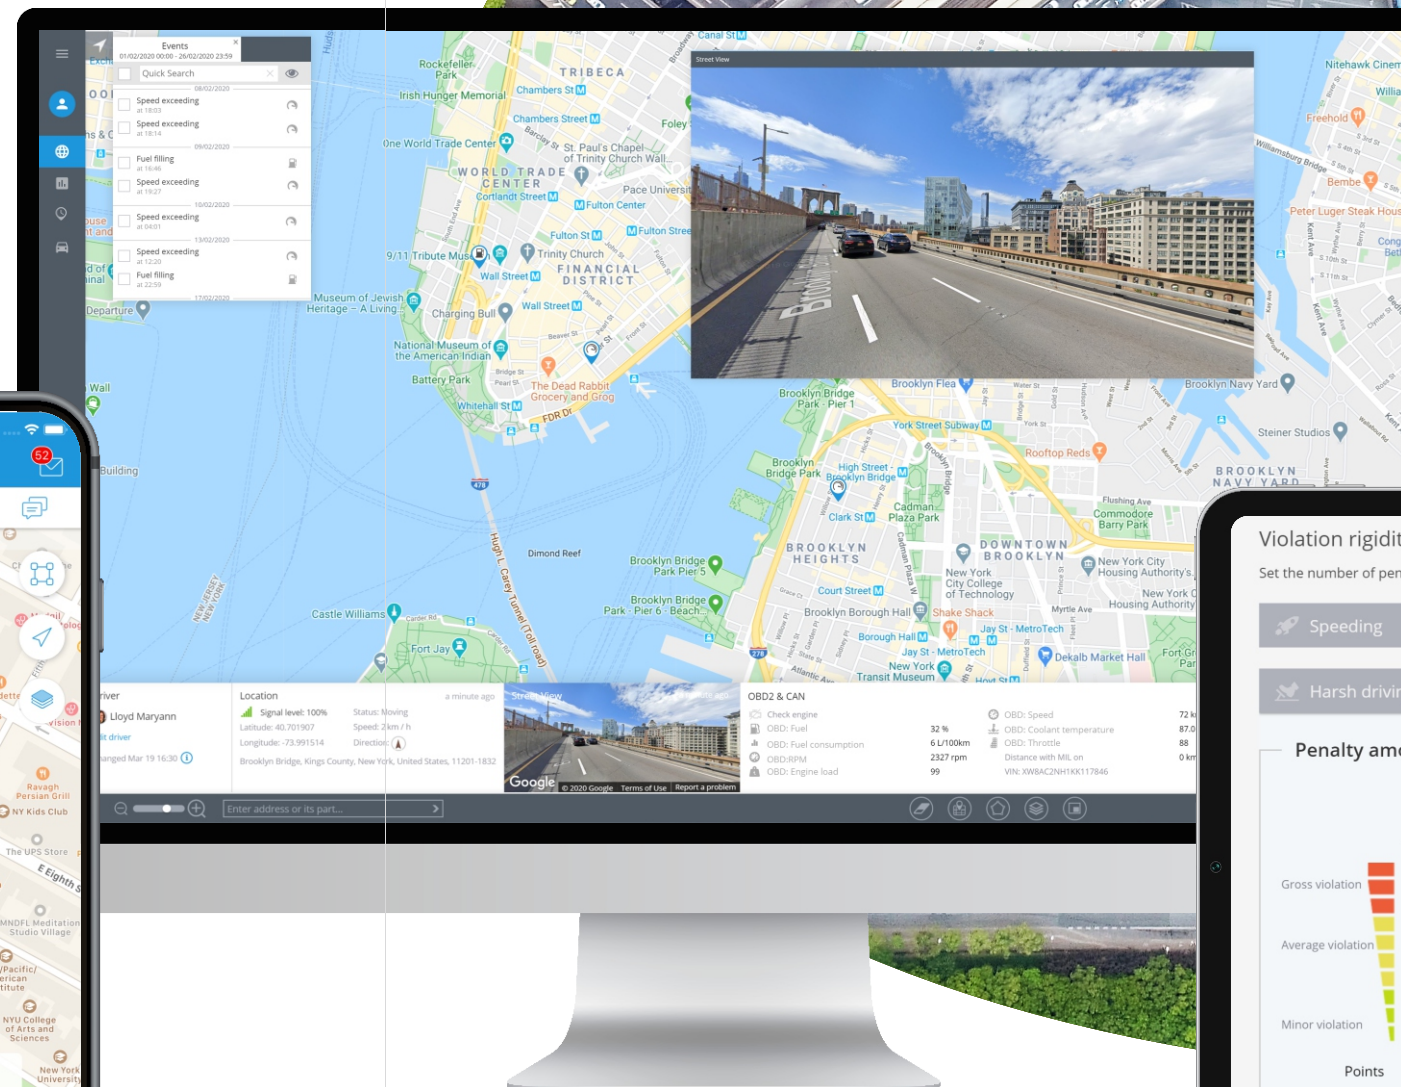

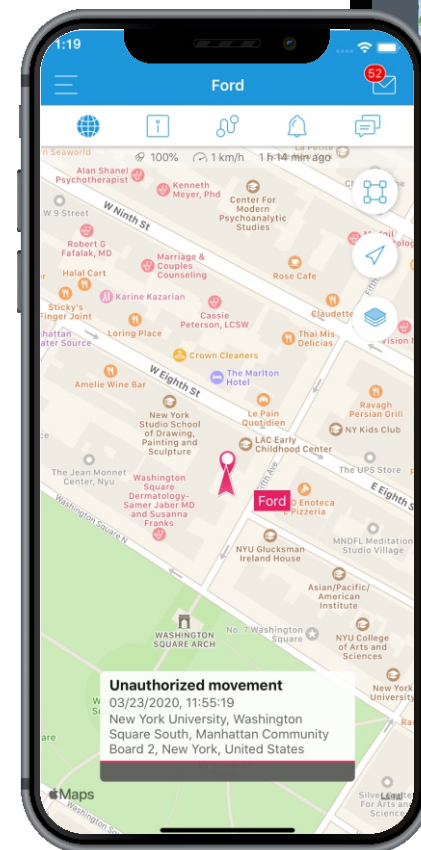

Tachograph   Driver journal  
Sutran   Vehicle inspection  
Data forwarding

## Location awareness

24/7 tracking   Real-time alerts  
Route optimization   Trip playback  
Turn-by-turn navigation

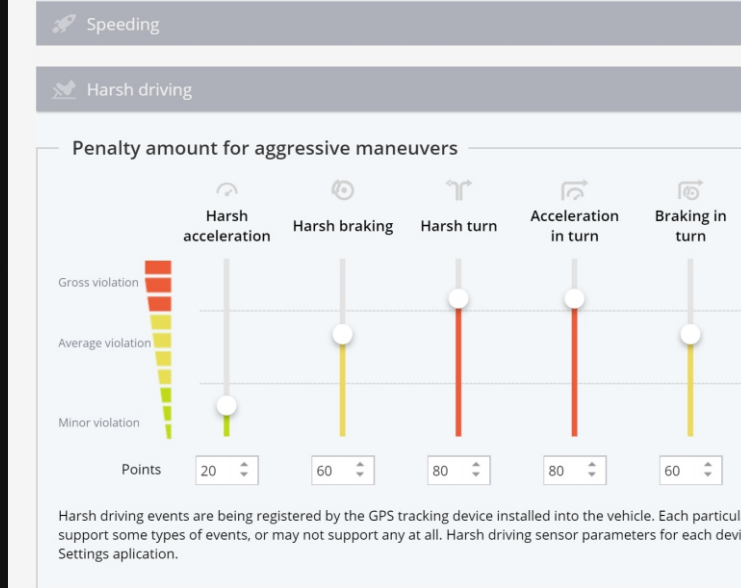

## Extended capabilities

Temperature   Humidity  
Axle load   Tire pressure  
CAN bus

## Violation rigidity settings

Set the number of penalty points that should be registered by the system for each type of violation

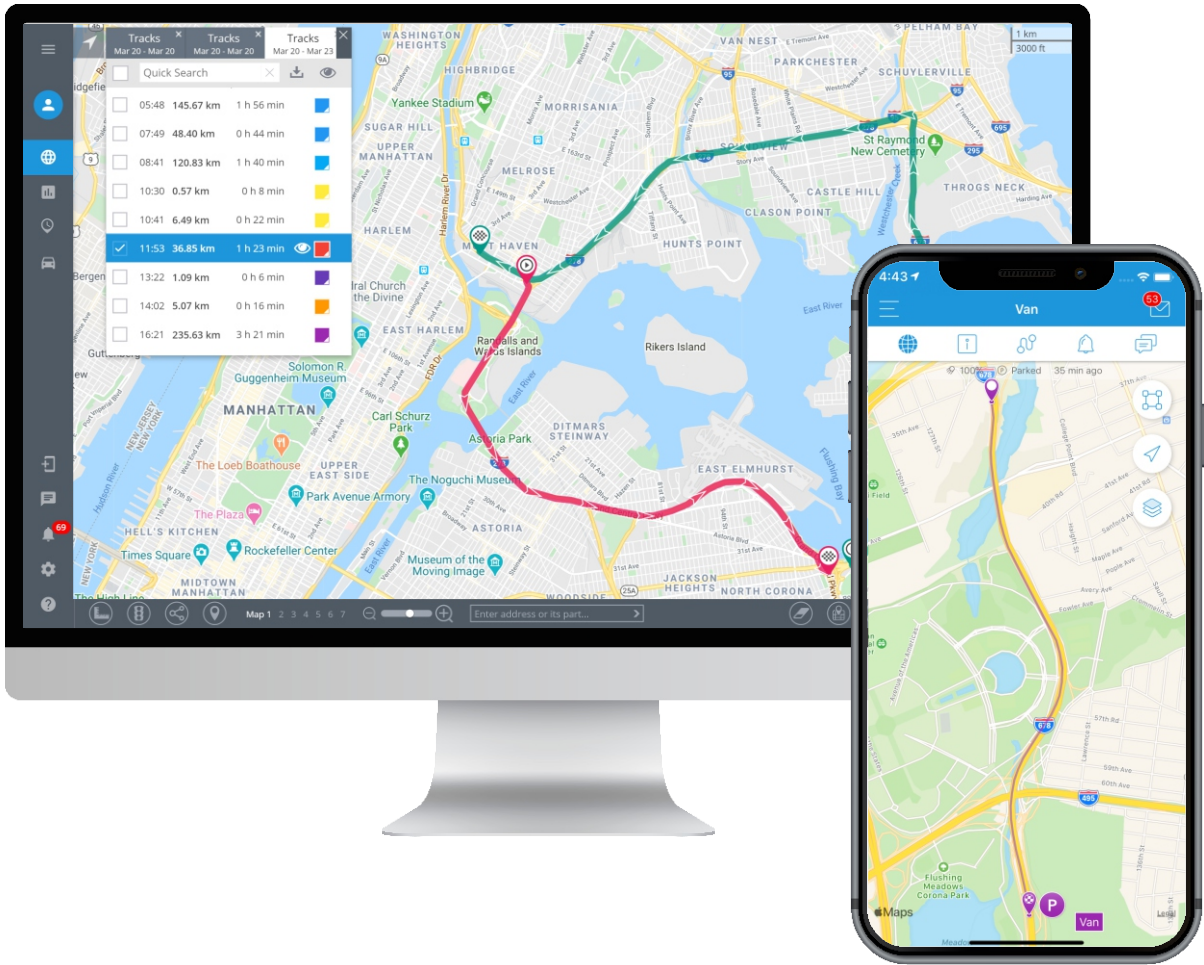

# Asset monitoring

Accurate tracking, rich mapping and intuitive design. Monitor vehicles, people and valuable assets. Keep tabs on important events.

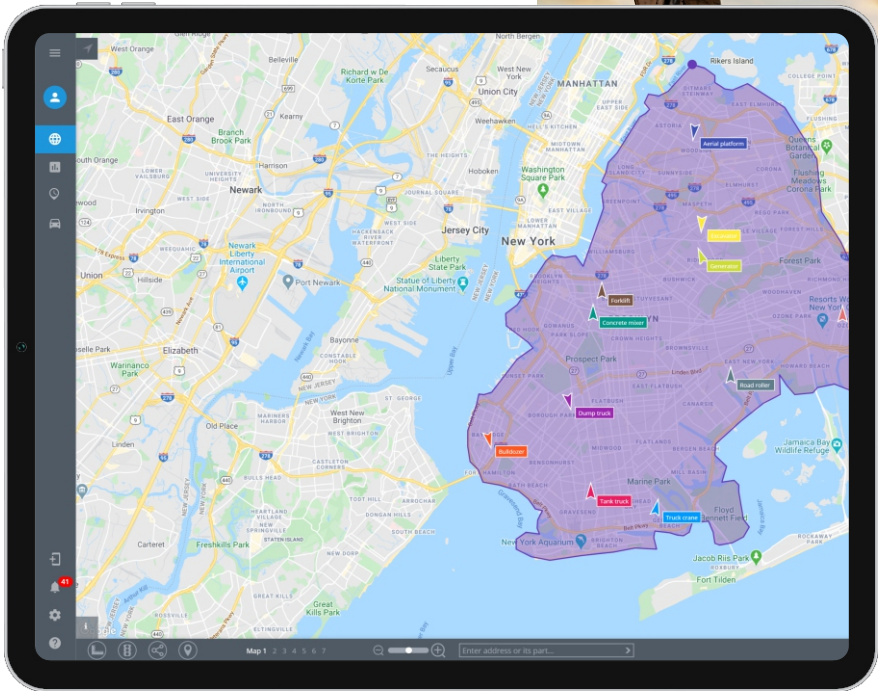

# Real-time telemetry

Collect and visualize sensor data. Analyze and improve utilization

-  Location
-  Battery life
-  Engine hours
-  Conditions (temperature, humidity)
-  Statuses
-  OBD2 and CAN
-  Container doors opening/ closing
-  Odometer

# Alerts and notifications

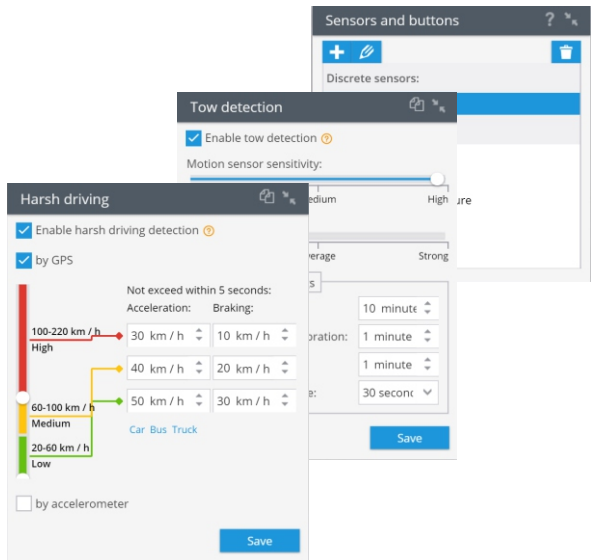

Stay updated on key events. Customize notifications. React on time with automatic alarms.

-  Fall detection
-  Door closing/opening
-  SOS button
-  Tow detection
-  Route deviation
-  Geofence entrance/exit
-  Temperature change
-  Jamming detection

# Connect and manage any IoT hardware

Seamlessly migrate thousands of assets. Explore automatic hardware activation and remote configuration. Get CAN data with plug-and-play simplicity.

# Navixy ecosystem

## Marketplace

Explore and use a variety of add-ons, extensions and plug-ins to reinforce your business. Distribute your solutions worldwide.

## API and SDK

Integrate Navixy with CRMs, ERPs or other external solutions through comprehensive REST API and SDK. Effortlessly build unique applications for specific business workflows.

# Mobile applications

Track assets and mobile workforce from smartphone or tablet.  
Dispatch tasks, manage workflow and browse the vital data online.

## X-GPS Tracker

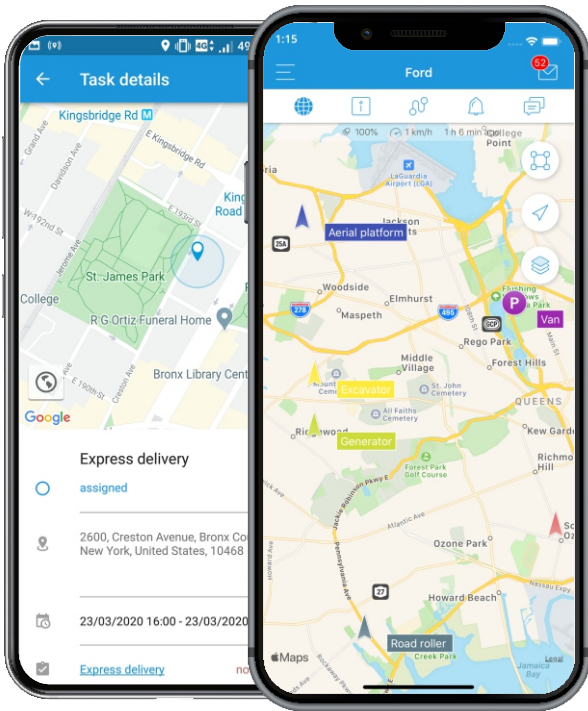

### For field employee

- Browse through tasks
- Share progress with the office
- Show your working status
- Enjoy paperless approach
- Chat with team members
- Use SOS button for emergency

## X-GPS Monitor

### For supervisor

- Track teams and assets
- Communicate with field
- Browse telemetry data
- Get instant notifications
- Assess field performance
- Block engine remotely

## Customization

Add your logo and preferred color scheme. Specify regional settings to adapt the platform to local markets. Extend your capabilities with 3rd party tools.

## Support 24/7

Our engineers and technical experts are ready to assist you every day. We'll be happy to share our expertise and technical knowledge.

## Community

Get access to trainings, private tours, and innovative insights from our international team. Scale up with global IoT community.
