

Expand your fleet management offering with AI-powered video telematics

Grow your business with an easy-to-sell video telematics solution.

Help customers improve fleet safety and gain complete trip visibility with live video, recorded footage, and AI-powered driver safety events in Navixy.

Everything your customers need for smarter fleet operations

Live streaming

Monitor road and cabin cameras in real time without leaving Navixy. Give fleet managers instant visibility into what's happening on the road.

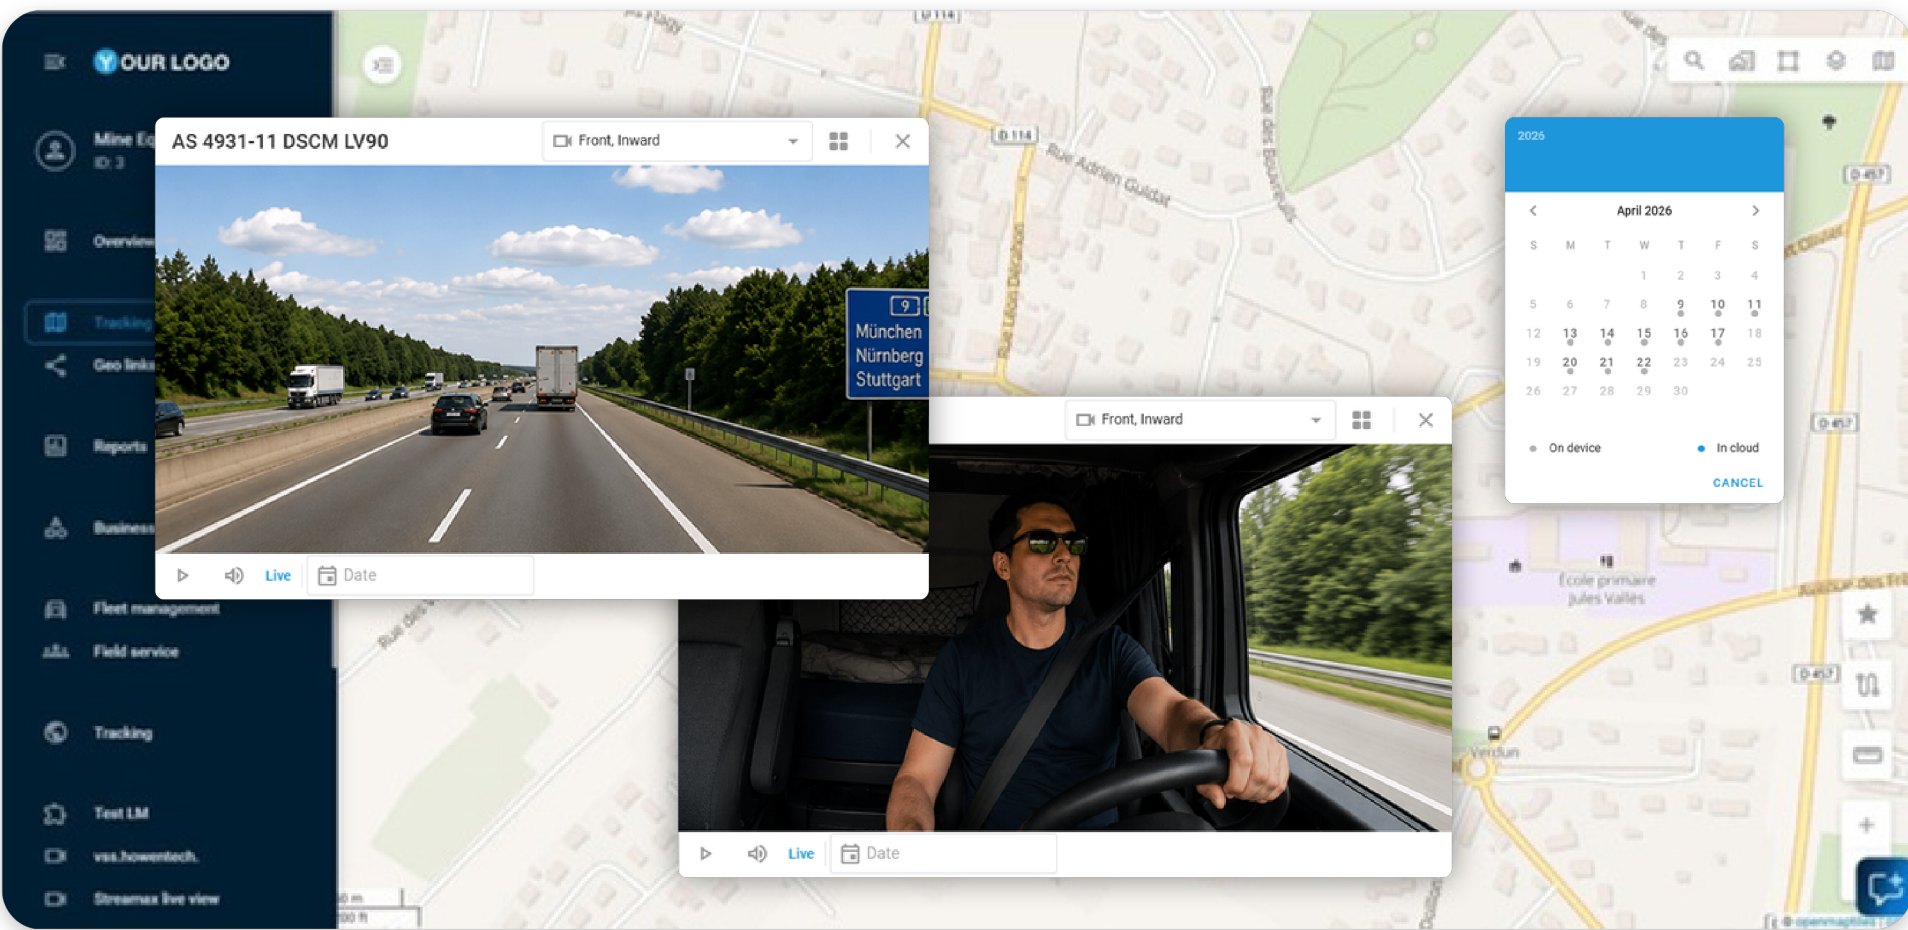

Video playback

Replay recorded footage alongside route history and vehicle location to quickly understand what happened before, during, and after an incident.

Video events

Review ADAS, DMS, car crash, SOS, and harsh driving events with automatically attached video evidence, making incident investigations and driver coaching more effective.

Choose the right dashcam for every monitoring need

Jimi JC261 | Jimi JC400

Road-facing dashcam with support for an optional external camera, giving fleets the flexibility to expand coverage where needed.

Ideal when

You need flexible camera placement or additional viewing angles.

Jimi JC261P | Jimi JC400P

Road-facing and cabin cameras integrated into a single device for comprehensive driver and vehicle monitoring.

Ideal when

You need built-in driver and road monitoring with minimal installation.

All four devices support automatic SMS activation in Navixy and use standard SIM and SD cards for onboard storage, making deployment quick and straightforward.

Supported ADAS/DMS events

Every event below is detected on-device and matched to a Navixy alert rule, with an attached video clip available in event history.

Event	JC261	JC261P	Category
SOS alarm	✓	✓	Safety
Car crash event	✓	✓	Safety
Harsh acceleration / braking / turning	✓	✓	Driving behavior
Speeding (device-detected)	✓	✓	Driving behavior
Fatigue driving	✓	✓	DMS
Yawning	✓	✓	DMS
Eyes closed	✓	✓	DMS
Distracted / head lowt	✓	✓	DMS
Smoking	✓	✓	DMS
Phone calling	✓	✓	DMS
No face detected	✓	✓	DMS
Front car collision warning	✓	✓	ADAS
Vehicle too close warning	✓	✓	ADAS
Lane deviation warning	✓	✓	ADAS

Why choose Navixy video telematics

Automate responses

Offer video telematics as a premium add-on alongside GPS tracking

One platform, less overhead

Deliver GPS tracking, live video, playback, and driver safety events through a single platform

Actionable safety insights

Help customers coach drivers, investigate incidents, and support insurance claims with synchronized video evidence

Reliable video delivery

The .ts video format helps preserve recorded footage even when uploads are interrupted

Fast deployment

Automatic SMS activation streamlines device provisioning and speeds up rollout

Ready to add video telematics to your offering?
